STAY IN THE LOOP WITH UPDATES AND ANNOUNCEMENTS!

## AT A GLANCE

- **Updates at West**
- **Updates at Crocker**
- **District Wide Furniture Upgrades**

The contractors at West have been working through the Thanksgiving break to keep production going! With all the dirt that was previously removed, they are now starting to backfill the area as they continue grading the site. In construction, grading involves shaping and leveling the ground to create a stable, even surface for the building while ensuring proper drainage throughout the area.

With the groundwork nearing completion, contractors are outlining the building footings, which will serve as the foundation for the new MPR structure. A proper foundation is one of the most critical elements of any building. It literally supports everything above it - structurally, financially, and for long-term safety.

Our contractors have been working very carefully to complete this phase of construction and soon we will start to see the structural framing!

# Crocker Updates & District Wide Furniture Upgrades!

## Crocker MPR & Administration Building, New Furniture

### Crocker Multi-Purpose Room and Administration Building:

Designers are currently awaiting feedback from the Division of the State Architect (DSA) on the submitted project plans. The DSA review ensures that all designs meet the required safety and accessibility standards for California schools. Once DSA approval is received, the project team will move forward with final preparations for construction, which is anticipated to begin in summer 2026. We look forward to sharing more updates as the project moves closer to the construction phase.

### District Wide Furniture Upgrades:

Over the Thanksgiving break, our contractors have worked daily to get new classroom furniture assembled and delivered to all our sites. Upgrading classroom furniture creates a more comfortable, safe, and engaging learning environment for students. New student desks, tables and chairs improve posture and focus, support modern teaching, collaboration, and enhance the classroom environment. Fresh, updated spaces also boost student and staff morale, show our community's commitment to education, and help reduce long-term maintenance costs.

Thank you for supporting improvements that directly benefit our students every day!

### Recycled Classroom Furniture!

Hillsborough City School District supports reuse and sustainability. We are excited to share that the previous classroom furniture items listed below have found a new home in the neighboring city of San Bruno.

- 250+ student desks
- 250+ student chairs
- Multiple various shaped tables for small group sessions
- Classroom area rug

By repurposing these items, we are extending the life of our furnishings while continuing to support students in another school community.
