West and Crocker MPR

Designing, Planning, & More Planning!

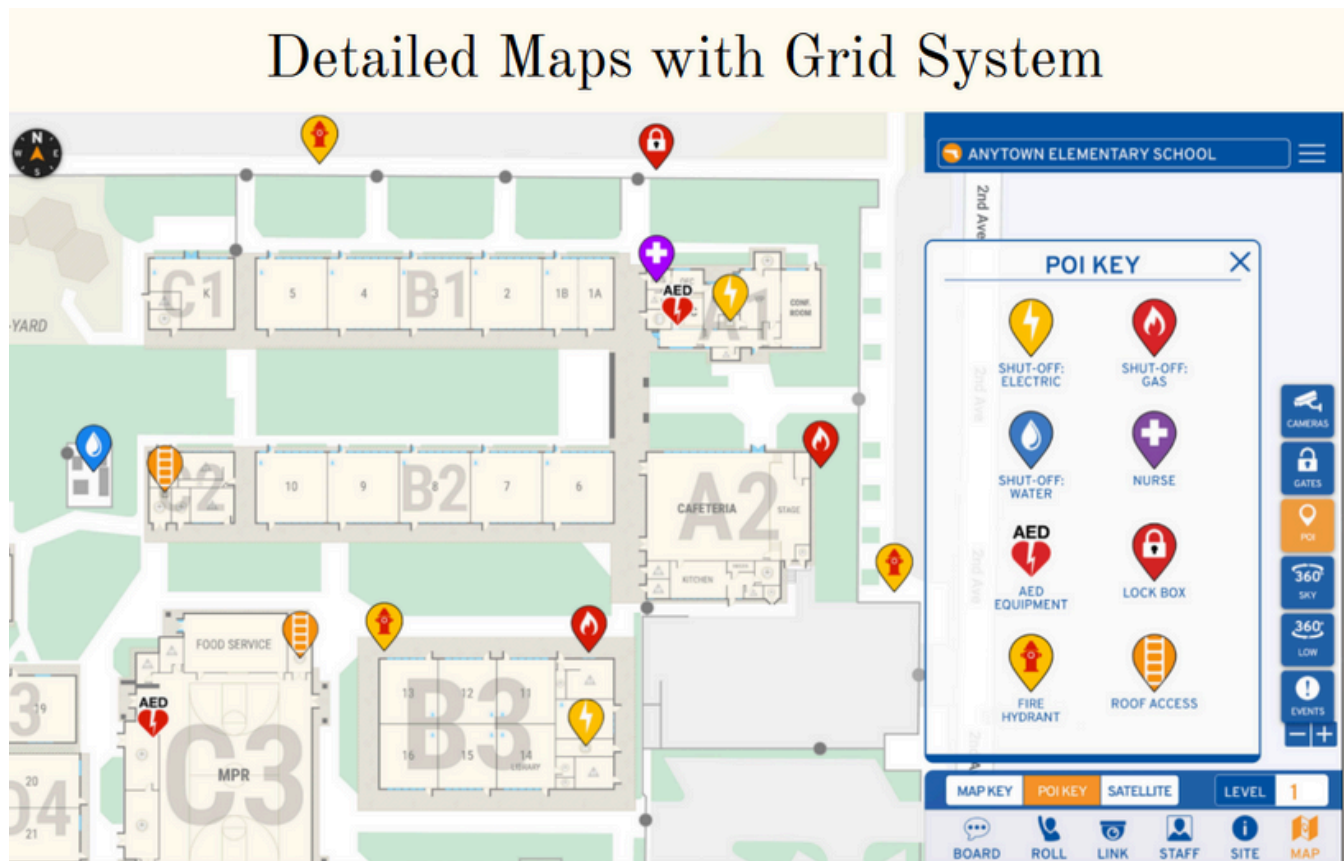

The District, Van Pelt Construction Services, QKA Architects, WRNS Studio, and Blach Construction continue to work closely to outline the exciting plans for the new Multi-purpose Rooms for both Crocker and West. The teams are working on site logistics plans for this upcoming Summer. We will continue to update the community as this work moves forward. If you have any questions regarding any of the upcoming HCSD construction projects, please reach out to Measure H consultants Larry Raffo at lraffo@hcsdk8.org or Louann Carlomagno at lcarlomagno.consultant@hcsdk8.org

Security Upgrades, and Roofing & HVAC!

Project Updates

Security Cameras on All Campuses

We are excited to share that we are completing the first phase of our security camera installations. Cameras will first be installed at the District Office as we have had recent maintenance yard break-ins. Security cameras will also be installed at Crocker Middle School in the coming months. District staff and site administrators gathered feedback from parents and staff and worked with security camera experts to strategically place the cameras around campus. Notices will be posted on all campuses letting students, staff, families and the community know that security cameras are in operation.

Along with the security cameras, the district has added an additional feature to the camera systems that grants First Responders access to all campuses via their devices. In case of an emergency, Hillsborough Police Department and First Responders will have access to detailed maps of where to find shut off valves for gas, water, electric and more! Also, a one-directional message board allows law enforcement and site administrators to communicate directly with the site staff.

Crocker and South Roofing & HVAC

Architects

Crocker and South Roofing and HVAC Projects

The district has awarded Finney Architects a contract to provide architectural services for the Crocker and South Roofing and HVAC projects this Summer. Finney Architects are familiar with the District Standards as they have assisted with the recent Roofing and HVAC projects at North and West. Their architectural designs will include 20-30% heat pumps for energy efficiency. The district and architects are currently working with PG&E, ensuring the transformers at each site will provide sufficient power for the new HVAC units.

One of the goals of the HCSD Facilities Master Plan is having air conditioning in all classrooms. Once we have completed our work at South and Crocker schools this summer, we will have met this goal. We are excited to continue to upgrade all learning spaces on our campuses and we thank you for your ongoing support!

New Science Furniture at Crocker!

Science Furniture Upgrades

Crocker recently received new furniture for all six science classrooms. The Crocker science team was excited for the delivery and installation of new student tables and chairs. All science classrooms were upgraded with the new student furniture, the height adjustable tables with phenolic tops are ideal for science experiments and activities. Thank you Measure H for enhancing the learning experience!

Thanks Measure H – New Crocker Science Furniture
